Co-hosted with the US Chamber of Commerce and SC Cyber

Anticipated Attendance: 200-250

New in 2017, this summit was designed with both small and large businesses in mind. Broadband and information technology are powerful factors impacting reach into new markets and increased productivity and efficiency. However, businesses need a cybersecurity strategy to protect both organizational infrastructure and customer data from growing cybersecurity threats. This event will teach businesses to mitigate cybersecurity risks and to identify and prepare for potential threats. It will also provide a primer on the economic impact of cybersecurity and how it can affect our state's infrastructure.
